Crest
secure. reliable.

CASE STUDY

About Crest IT

The journey started back in 2012 with a focus on providing IT infrastructure solutions to the customers. Crest IT Consulting started with a small team, focusing on security products. After several iterations, they narrowed down on Unstructured Data Security and Automation of IT infra as the focus areas.

The company has built a focussed product portfolio with strong relationships with the OEM's and trained and dedicated engineers to deliver but in class designs and services to our customers. The company's focus is on IT compliance, Security and Infrastructure of Unstructured data in large, Diversified conglomerates, Automating internal processes, Organising data, securing data and Analytics around data security is what the organisation stands for.

Business Challenges

- Inconsistent and terrible support

- High pricing

- Download bandwidth

- Number of hours

NxtGen
Infinite Datacenter

• Element of trust developed with a period of time

• Solution provided and implementation was very nice

• Stability and better resolutions

• Secure and reliable

Business Outcomes

With This Quick Turnaround we were able to get more customers for Cloud.

> "
> NxtGen has been a key success partner for Crest IT Solutions. We have been associated with NxtGen for past 3 years and this relationship has been extremely precious. We were looking for a solution that is affordable and helps us optimize our infrastructure cost and we must say that NxtGen has helped deliver what they had committed. With NxtGen technology, we have delivered solutions to our clients in a more relevant manner and a customer-centric approach. We must say that we made the right choice, NxtGen did not only meet our requirements but also exceeded all our expectations.
>
> Thanks to NxtGen for their constant support and dedication!
